Fernco Inc.

BASEMENT REPAIR KIT

PERMANENTLY REPAIRS CRACKS IN POURED CONCRETE FOUNDATION WALLS

SCAN TO LEARN MORE

WHAT THE **PROS TRUST**

Professional-grade solution trusted for manholes, vaults, and other demanding applications. Penetrates deep for a permanent, non-shrinking seal. Hyperflex is NSF/ANSI/CAN 61 approved.

STOPS LEAKS AT THE SOURCE

Fills hairline to ½ inch cracks up to 10 feet long, including vertical or diagonal cracks, seams, joints, and areas around egress windows. **Forms a watertight barrier to help prevent mold and structural damage**. Not for horizontal structural cracks.

HELPS **LIMIT RADON EXPOSURE**

Blocks basement cracks that allow radon and other soil gases to enter, **helping improve indoor air quality and supporting your radon mitigation efforts**, while helping keep your home safer and healthier with a stronger, more reliable barrier.

The Fernco Basement Repair Kit delivers professional crack sealing in an easy DIY format. HyperFlex® expands deep inside cracks up to 10' long and ½" wide, reacting with water to form a flexible, watertight seal that protects against leaks, radon, and soil gases—no drilling or excavation required.
