

DIRECTIONAL FITTINGS

QWIK 45S, WYES, TEES, & ELLS

INSTALL IN TIGHT SPACES

Flexible construction makes fittings **easier to position** where rigid components are difficult to maneuver.

CONNECT MIXED MATERIALS

Easily connect cast iron, steel, Schedule 40 PVC, and ABS within the same above-ground DWV installation.

REPAIR EXISTING SYSTEMS

Extra-length models help reconnect to existing pipe after fitting removal, **reducing added pipe replacement.**

When Every Connection Counts

Fernco Directional Fittings simplify above-ground DWV repairs, reroutes, and remodeling projects.. The flexible PVC design and extra-length body make installation easier in tight spaces, especially when replacing fittings cut out at the joint. Available in Tees, 90° Ells, 45° Ells, and Wyes, they install without primers, glues, or special tools and are compatible with cast iron, plastic, steel, copper, and lead pipe. Use Fernco Qwik Bushings when reducing pipe sizes.

Directional Fittings

FIND THE RIGHT DIRECTIONAL FITTING

Connects common above-ground DWV pipe materials, including plastic (SCH. 40 and ABS), cast iron and steel.

QWIK 90° ELBOW

Creates 90° directional changes in above-ground DWV piping, especially where rigid fittings are difficult to maneuver.

SKU	NOMINAL PIPE SIZE
QL-150	1½ in.
QL-200	2 in.
QL-300	3 in.
QL-400	4 in.

QWIK TEE

Creates 90° branch connections for above-ground DWV repair, alteration and expansion projects.

SKU	NOMINAL PIPE SIZE
QT-150	1½ in.
QT-200	2 in.
QT-300	3 in.
QT-400	4 in.

QWIK 45° ELBOW

Creates smoother directional changes while providing greater layout flexibility in confined spaces.

SKU	NOMINAL PIPE SIZE
Q45-150	1½ in.
Q45-200	2 in.

QWIK WYE

Creates angled branch connections in horizontal above-ground DWV runs for repair and alteration work.

SKU	NOMINAL PIPE SIZE
QY-150	1½ in.
QY-200	2 in.

When one connection requires a smaller nominal pipe size, use a Fernco Qwik Bushing in that fitting opening.
